

Insurance Training Simulation Platform

Evaluation Guide

What Is This?

The Insurance Training Simulation Platform is an AI-powered interactive training tool that teaches and assesses insurance professionals through realistic, conversational simulations. Powered by Anthropic's Claude, the platform places users in the role of an insurance professional and presents them with lifelike scenarios featuring multiple AI-driven personas (claimants, witnesses, agents, attorneys, etc.). Users must navigate each scenario by asking questions, reviewing documents, making decisions, and resolving the case — just as they would in a real-world setting.

The platform currently supports three scenario types spanning different insurance disciplines:

1. **Auto Claims Adjusting** — Handle a two-vehicle intersection collision from first notice of loss through resolution
 2. **Commercial Property Underwriting** — Assess risk, price, and bind a commercial property insurance policy
 3. **Insurance Marketing** — Plan and execute a product launch campaign for a usage-based auto insurance product
-

Getting Started

Creating an Account

1. Navigate to the application URL
2. Click **Register** and enter your full name, email address, and a password (minimum 6 characters)

3. After registration, you will be redirected to the main dashboard

Logging In

- 1. Enter your email and password on the login page
- 2. Click **Sign In** to access the dashboard

Starting a Simulation

From the dashboard, click **New Simulation** (or navigate to **Scenarios** in the sidebar). You will configure four settings before launching:

1. Choose a Scenario

Scenario	Discipline	What You Do	Duration
Two-Vehicle Intersection Collision	Claims	Investigate a disputed collision, determine liability, assess damages, and negotiate a settlement	30-60 min
Commercial Property Underwriting	Underwriting	Review a submission for a retail electronics store, assess risks, price the policy, negotiate terms, and bind coverage	30-60 min
SmartDrive Product Launch Campaign	Marketing	Conduct market research, develop strategy, create content, enable agents, launch and track a campaign	30-60 min

2. Select a Mode

Mode	Coaching	Scoring Visibility	Best For
Learning	Real-time coaching tips and hints appear throughout the simulation	Scores are shown as you go	Building foundational skills; first-time users

Assessment	No coaching or hints provided	Scores are hidden until the final report	Evaluating readiness; certification testing
Hybrid	Coaching during the first 3 phases, then transitions to silent assessment	Visible early, then hidden	Balanced skill-building with evaluation

3. Select an Experience Level

Level	Language Style	Pacing	Best For
Beginner	Simple language; insurance terms are explained when used	Patient and slower-paced	New hires; those new to the discipline
Intermediate	Standard industry language; only uncommon terms explained	Moderate pacing	Professionals with some experience
Experienced	Full technical jargon; no term explanations	Fast-paced; personas may push back on unnecessary questions	Senior professionals

4. Select a Difficulty

Difficulty	Persona Behavior	Evidence	Complexity
Guided	Cooperative and forthcoming	Clear and straightforward	Simplified; transition hints provided
Standard	Realistic; information shared only when asked	Some ambiguity; requires thorough investigation	True-to-life complexity
Advanced	Uncooperative parties; attorney involvement	Conflicting evidence; fraud indicators	High complexity with coverage disputes

Click **Start Simulation** to begin.

The Simulation Experience

Chat Interface

The simulation takes place in a real-time chat interface. You type messages as the insurance professional, and the AI responds in character as different personas relevant to the scenario.

Layout: - **Left sidebar** — Session information, phase progress tracker, and a list of documents you have accessed - **Center** — The main conversation area where you interact with personas - **Right panel** (when opened) — Progress tracker showing task checklist or running scores

Interacting with Personas

Each scenario features multiple AI-driven characters. For example, in the auto claims scenario you may speak with:

- **Sarah Mitchell** — The insured driver reporting the accident
- **James Torres** — The other driver (claimant)
- **Linda Park** — An eyewitness
- **Mike's Auto Body** — The repair shop providing damage estimates
- **Dr. Patel** — The treating physician
- **Attorney Davis** — Legal representation for the claimant

The AI automatically switches between personas based on the conversation context. Each persona has a unique colored avatar and their name and role are displayed with their messages.

Message Types

You will see several types of messages during a simulation, each visually distinct:

- **Your messages** — Blue bubbles on the right side
- **Persona responses** — White bubbles on the left with persona name and avatar
- **Documents** — Amber-highlighted panels showing evidence files (police reports, policy declarations, medical records, etc.)
- **Coaching tips** (Learning mode) — Green panels with a lightbulb icon offering guidance

- **Score events** (Learning mode) — Purple panels showing how specific actions were scored
- **Phase transitions** — Blue banners indicating you have moved to a new phase

Phase Progression

Each scenario has 7 phases that you progress through sequentially. The sidebar shows your current position:

Claims Phases: FNOL > Coverage Verification > Investigation > Liability Assessment > Damage Assessment > Negotiation > Resolution

Underwriting Phases: Submission Review > Risk Assessment > Loss History > Pricing & Rating > Terms & Conditions > Negotiation > Binding

Marketing Phases: Market Research > Strategy Development > Content Creation > Agency Enablement > Campaign Launch > Performance Tracking > Reporting

Completed phases show a green indicator, the current phase shows blue, and upcoming phases show gray.

Progress Tracker

Click the **Progress** button (Learning/Hybrid mode) or **Score** button (Assessment mode) in the top-right of the chat header to open the progress panel:

In Learning/Hybrid Mode: - Overall phase progress bar (e.g., 3/7 phases completed) - A checklist of required tasks for the current phase with completion status - Running dimension scores (if scoring events have occurred)

In Assessment Mode: - Overall phase progress bar - Running score breakdown by dimension with progress bars - Overall score and performance level

Click **Refresh Progress** at the bottom of the panel to update the data.

Scoring System

Six Competency Dimensions

Your performance is evaluated across six weighted dimensions:

Dimension	Weight	What It Measures
Technical Knowledge	25%	Understanding of insurance concepts, policy language, regulations, and industry standards
Investigation Quality	20%	Thoroughness in gathering facts, asking the right questions, and reviewing evidence
Communication	20%	Clarity, professionalism, and effectiveness when interacting with all parties
Judgment & Decision-Making	20%	Quality of decisions, soundness of rationale, and appropriate use of evidence
Process Adherence	10%	Following proper procedures, documentation standards, and workflow requirements
Fraud/Risk Awareness	5%	Identifying red flags, inconsistencies, and potential fraud or risk indicators

Scoring Scale

Each scored action receives a rating from 1 to 4:

Score	Level	Meaning
4	Exemplary	Exceeds expectations; demonstrates expert-level competency
3	Proficient	Meets expectations; demonstrates solid working knowledge
2	Developing	Partially meets expectations; shows understanding but has gaps
1	Needs Improvement	Does not meet expectations; significant gaps in knowledge or execution

Overall Score

Your overall score is the weighted average of all dimension scores, reported on the same 1.0-4.0 scale.

Performance level thresholds:

- **3.5 - 4.0** — Exemplary
- **2.5 - 3.4** — Proficient
- **1.5 - 2.4** — Developing
- **Below 1.5** — Needs Improvement

Performance Report

After completing a simulation, click **View Report** from the dashboard or the session page. The report includes:

1. **Overall Score** — Your weighted score and performance level with color-coded badge
2. **Dimension Breakdown** — Individual scores for all six competency dimensions with visual progress bars
3. **Strengths** — Your highest-performing areas with specific examples from the simulation
4. **Areas for Improvement** — Dimensions where performance was lower, with actionable feedback
5. **Phase-by-Phase Narrative** — A summary of your actions and decisions in each phase
6. **Recommendations** — Targeted suggestions for professional development

Managing Sessions

Dashboard

The dashboard displays all your simulation sessions with status indicators:

- **Active** (green) — Click to resume the simulation
- **Paused** (yellow) — Session is paused; click to resume
- **Completed** (blue) — Click to view the performance report
- **Abandoned** (gray) — Session was abandoned

Deleting a Session

Click the trash icon on any session card and confirm the deletion. This permanently removes the session, all messages, and any associated report.

Admin Features

Users with administrator access see an additional **Admin** section in the sidebar with:

- **Analytics Dashboard** — Platform-wide metrics including total sessions, completion rates, average scores, and distribution charts for modes and difficulty levels
 - **User Management** — View all registered users and their roles
-

Tips for Evaluators

When evaluating the platform, consider trying the following:

1. **Start with Learning mode on Guided difficulty** to see the full coaching experience and understand what a complete simulation flow looks like
2. **Try Assessment mode on Standard difficulty** to experience the testing workflow and see a realistic performance report
3. **Test all three scenarios** to see how the platform adapts to different insurance disciplines
4. **Compare experience levels** — Start one session as Beginner and another as Experienced to see how the AI adapts its language and pacing
5. **Use the Progress Tracker** during a session to see real-time task tracking and scoring
6. **Complete at least one full simulation** to generate a performance report and review the scoring output
7. **Try asking unexpected questions** or making intentional mistakes to see how the AI responds and scores those interactions
8. **Check the Help page** (sidebar) for the built-in user documentation

Key Questions for Evaluation

- Does the AI respond realistically and stay in character?
- Are the coaching tips helpful and contextually appropriate?
- Do the phase transitions feel natural and well-timed?
- Is the scoring fair and does the feedback match the actions taken?
- Is the performance report actionable and detailed enough?
- Does the difficulty scaling feel meaningfully different across tiers?
- Would this tool be effective for training new adjusters, underwriters, or marketing professionals?

Technical Requirements

- Modern web browser (Chrome, Firefox, Safari, or Edge)
- Internet connection
- No software installation required

For questions or issues, contact the development team or refer to the in-app Help page.
